

To the Commissioners:

My wife and I enjoy the diversity available on XM Radio, and appreciate the ability to get the type of information we want, when we want it. When large corporate organizations such as the NAB try to explain that restricting information services such as weather and traffic is actually better for me than allowing broader availability, I immediately know that is not true.

Thus, I respectfully request you reject the NAB's petition 04-160. Restricting information that clearly belongs to the public is not in anyone's best interests, and the bill is far too restrictive to services such as XM Radio for the sole benefit of the NAB's members. Thank you for taking the time to consider this request. I will be happy to answer any further questions or request for information you may have.

Sincerely,

Mike Toot
